

Standard Protocol Items: Recommendations for Interventional Trials

## SPIRIT 2013 Checklist: Recommended items to address in a clinical trial protocol and related documents\*

| Section/item               | ltem<br>No                 | Description  | Page     |  |  |
|----------------------------|----------------------------|--|----------|--|--|
| Administrative i           | Administrative information |  |          |  |  |
| Title                      | 1                          | Descriptive title identifying the study design, population, interventions, and, if applicable, trial acronym   | 1 and 4  |  |  |
| Trial registration         | 2a                         | Trial identifier and registry name. If not yet registered, name of intended registry   | 1 and 2  |  |  |
|                            | 2b                         | All items from the World Health Organization Trial Registration Data Set   | 4 and 5  |  |  |
| Protocol version           | 3                          | Date and version identifier  | 13       |  |  |
| Funding                    | 4                          | Sources and types of financial, material, and other support  | 14       |  |  |
| Roles and responsibilities | 5a                         | Names, affiliations, and roles of protocol contributors  | 1 and 15 |  |  |
|                            | 5b                         | Name and contact information for the trial sponsor   | 1        |  |  |
|                            | 5c                         | Role of study sponsor and funders, if any, in study design;<br>collection, management, analysis, and interpretation of data;<br>writing of the report; and the decision to submit the report for<br>publication, including whether they will have ultimate authority<br>over any of these activities | 14       |  |  |
|                            | 5d                         | Composition, roles, and responsibilities of the coordinating centre,<br>steering committee, endpoint adjudication committee, data<br>management team, and other individuals or groups overseeing<br>the trial, if applicable (see Item 21a for data monitoring committee)                            |          |  |  |
| Introduction               |                            |  |          |  |  |
| Background and rationale   | 6a                         | Description of research question and justification for undertaking<br>the trial, including summary of relevant studies (published and<br>unpublished) examining benefits and harms for each intervention   | 3-4      |  |  |
|                            | 6b                         | Explanation for choice of comparators  | 9 and 10 |  |  |
| Objectives                 | 7                          | Specific objectives or hypotheses  | 8 and 9  |  |  |

| Trial design            | 8      | Description of trial design including type of trial (eg, parallel group, crossover, factorial, single group), allocation ratio, and framework (eg, superiority, equivalence, noninferiority, exploratory)   | 4-8                              |
|-------------------------|--------|---|----------------------------------|
| Methods: Partic         | ipants | s, interventions, and outcomes  |                                  |
| Study setting           | 9      | Description of study settings (eg, community clinic, academic hospital) and list of countries where data will be collected. Reference to where list of study sites can be obtained  | 4                                |
| Eligibility criteria    | 10     | Inclusion and exclusion criteria for participants. If applicable,<br>eligibility criteria for study centres and individuals who will perform<br>the interventions (eg, surgeons, psychotherapists)  | 4 and 5                          |
| Interventions           | 11a    | Interventions for each group with sufficient detail to allow replication, including how and when they will be administered  | 5-8                              |
|                         | 11b    | Criteria for discontinuing or modifying allocated interventions for a given trial participant (eg, drug dose change in response to harms, participant request, or improving/worsening disease)  | 15                               |
|                         | 11c    | Strategies to improve adherence to intervention protocols, and<br>any procedures for monitoring adherence (eg, drug tablet return,<br>laboratory tests)   | Figure 2<br>Figure 3<br>Page 7-8 |
|                         | 11d    | Relevant concomitant care and interventions that are permitted or prohibited during the trial   | Figure 2<br>Figure 3             |
| Outcomes                | 12     | Primary, secondary, and other outcomes, including the specific<br>measurement variable (eg, systolic blood pressure), analysis<br>metric (eg, change from baseline, final value, time to event),<br>method of aggregation (eg, median, proportion), and time point for<br>each outcome. Explanation of the clinical relevance of chosen<br>efficacy and harm outcomes is strongly recommended | 8-9                              |
| Participant<br>timeline | 13     | Time schedule of enrolment, interventions (including any run-ins<br>and washouts), assessments, and visits for participants. A<br>schematic diagram is highly recommended (see Figure)  | Figure 4                         |
| Sample size             | 14     | Estimated number of participants needed to achieve study<br>objectives and how it was determined, including clinical and<br>statistical assumptions supporting any sample size calculations   | 9-10                             |
| Recruitment             | 15     | Strategies for achieving adequate participant enrolment to reach target sample size   | 9-10                             |
| Methods: Assig          | nment  | of interventions (for controlled trials)  |                                  |

Allocation:

| Sequence<br>generation                 | 16a    | Method of generating the allocation sequence (eg, computer-<br>generated random numbers), and list of any factors for<br>stratification. To reduce predictability of a random sequence,<br>details of any planned restriction (eg, blocking) should be provided<br>in a separate document that is unavailable to those who enrol<br>participants or assign interventions  | 5                     |
|--|--------|---|-----------------------|
| Allocation<br>concealment<br>mechanism | 16b    | Mechanism of implementing the allocation sequence (eg, central telephone; sequentially numbered, opaque, sealed envelopes), describing any steps to conceal the sequence until interventions are assigned   | 5                     |
| Implementatio<br>n                     | 16c    | Who will generate the allocation sequence, who will enrol participants, and who will assign participants to interventions   | 5-9                   |
| Blinding<br>(masking)                  | 17a    | Who will be blinded after assignment to interventions (eg, trial participants, care providers, outcome assessors, data analysts), and how   |                       |
|  | 17b    | If blinded, circumstances under which unblinding is permissible,<br>and procedure for revealing a participant's allocated intervention<br>during the trial  | 5-9                   |
| Methods: Data c                        | ollect | ion, management, and analysis   |                       |
| Data collection<br>methods             | 18a    | Plans for assessment and collection of outcome, baseline, and<br>other trial data, including any related processes to promote data<br>quality (eg, duplicate measurements, training of assessors) and a<br>description of study instruments (eg, questionnaires, laboratory<br>tests) along with their reliability and validity, if known. Reference<br>to where data collection forms can be found, if not in the protocol | Figure 4<br>Page 8-10 |
|  | 18b    | Plans to promote participant retention and complete follow-up,<br>including list of any outcome data to be collected for participants<br>who discontinue or deviate from intervention protocols   | 5-7                   |
| Data<br>management                     | 19     | Plans for data entry, coding, security, and storage, including any<br>related processes to promote data quality (eg, double data entry;<br>range checks for data values). Reference to where details of data<br>management procedures can be found, if not in the protocol  | 5                     |
| Statistical methods                    | 20a    | Statistical methods for analysing primary and secondary outcomes. Reference to where other details of the statistical analysis plan can be found, if not in the protocol  | 9-10                  |
|  | 20b    | Methods for any additional analyses (eg, subgroup and adjusted analyses)  | 9-10                  |

|                          | 20c        | Definition of analysis population relating to protocol non-<br>adherence (eg, as randomised analysis), and any statistical<br>methods to handle missing data (eg, multiple imputation)   | 9-10  |
|--------------------------|------------|--|---|
| Methods: Monito          | oring      |  |   |
| Data monitoring          | 21a        | Composition of data monitoring committee (DMC); summary of its<br>role and reporting structure; statement of whether it is<br>independent from the sponsor and competing interests; and<br>reference to where further details about its charter can be found, if<br>not in the protocol. Alternatively, an explanation of why a DMC is<br>not needed | 14  |
|                          | 21b        | Description of any interim analyses and stopping guidelines,<br>including who will have access to these interim results and make<br>the final decision to terminate the trial  | 9   |
| Harms                    | 22         | Plans for collecting, assessing, reporting, and managing solicited<br>and spontaneously reported adverse events and other unintended<br>effects of trial interventions or trial conduct  | 15  |
| Auditing                 | 23         | Frequency and procedures for auditing trial conduct, if any, and whether the process will be independent from investigators and the sponsor  | 14  |
| Ethics and disse         | eminat     | ion  |   |
| Research ethics approval | 24         | Plans for seeking research ethics committee/institutional review board (REC/IRB) approval  | 15  |
| Protocol<br>amendments   | 25         | Plans for communicating important protocol modifications (eg,  | 1 and 13  |
|                          |            | changes to eligibility criteria, outcomes, analyses) to relevant<br>parties (eg, investigators, REC/IRBs, trial participants, trial<br>registries, journals, regulators)   |   |
| Consent or assent        | 26a        | parties (eg, investigators, REC/IRBs, trial participants, trial  | 5   |
|                          | 26a<br>26b | parties (eg, investigators, REC/IRBs, trial participants, trial<br>registries, journals, regulators)<br>Who will obtain informed consent or assent from potential trial  | 5<br>n.a.<br>(No planned<br>ancillary<br>studies) |
|                          |            | <ul> <li>parties (eg, investigators, REC/IRBs, trial participants, trial registries, journals, regulators)</li> <li>Who will obtain informed consent or assent from potential trial participants or authorised surrogates, and how (see Item 32)</li> <li>Additional consent provisions for collection and use of participant</li> </ul>             | N.a.<br>(No planned<br>ancillary<br>studies)      |

| 29  | Statement of who will have access to the final trial dataset, and disclosure of contractual agreements that limit such access for investigators   | 5   |
|-----|---|---|
| 30  | Provisions, if any, for ancillary and post-trial care, and for compensation to those who suffer harm from trial participation   | 10  |
| 31a | Plans for investigators and sponsor to communicate trial results to<br>participants, healthcare professionals, the public, and other<br>relevant groups (eg, via publication, reporting in results<br>databases, or other data sharing arrangements), including any<br>publication restrictions | 15  |
| 31b | Authorship eligibility guidelines and any intended use of professional writers  | 15-16   |
| 31c | Plans, if any, for granting public access to the full protocol, participant-level dataset, and statistical code   | 1   |
|     |   |   |
| 32  | Model consent form and other related documentation given to participants and authorised surrogates  | Appendix<br>II.   |
| 33  | Plans for collection, laboratory evaluation, and storage of<br>biological specimens for genetic or molecular analysis in the<br>current trial and for future use in ancillary studies, if applicable  | <ul> <li><b>N.a.</b> (No</li> <li>genetic or</li> <li>molecular</li> <li>analyses</li> <li>in the current</li> <li>trial and no</li> <li>planned</li> <li>ancillary</li> <li>studies)</li> </ul>  |
|     | 30<br>31a<br>31b<br>31c<br>32<br>33   | <ul> <li>disclosure of contractual agreements that limit such access for<br/>investigators</li> <li>Provisions, if any, for ancillary and post-trial care, and for<br/>compensation to those who suffer harm from trial participation</li> <li>Plans for investigators and sponsor to communicate trial results to<br/>participants, healthcare professionals, the public, and other<br/>relevant groups (eg, via publication, reporting in results<br/>databases, or other data sharing arrangements), including any<br/>publication restrictions</li> <li>Authorship eligibility guidelines and any intended use of<br/>professional writers</li> <li>Plans, if any, for granting public access to the full protocol,<br/>participant-level dataset, and statistical code</li> <li>Model consent form and other related documentation given to<br/>participants and authorised surrogates</li> <li>Plans for collection, laboratory evaluation, and storage of<br/>biological specimens for genetic or molecular analysis in the</li> </ul> |

\*It is strongly recommended that this checklist be read in conjunction with the SPIRIT 2013 Explanation & Elaboration for important clarification on the items. Amendments to the protocol should be tracked and dated. The SPIRIT checklist is copyrighted by the SPIRIT Group under the Creative Commons "Attribution-NonCommercial-NoDerivs 3.0 Unported" license.
