Grey Literature Search & Documentation Strategies

Strategy 1. Search Engine Searching

Procedure for selecting potentially relevant records for screening: review first 10 pages of search results or 100 results per search.

Search engine: Google

Date searched: 04-01-2022

#	Search	# Results retrieved*	# Results reviewed	# Records selected for screening**
1	Community-clinical linkage AND (guideline OR strategy OR report OR	~59,100,000	100

Strategy 2: Targeted Website Search

Procedure: browse/search websites of organizations (health care organizations, NGOs, governments, research collectives) that publish documents relevant to the research question, to identify potentially relevant documents for screening. Target websites identified through previous search engine search, preliminary literature review of content area and content experts.

Website Browsing Documentation:

Strategy 4: Contact knowledge experts

Procedure: contact content experts in the field who may be able to recommend specific documents relevant to the research question.

Knowledge Expert Documentation:
