

Ultra-processed foods and recommended intake levels of nutrients linked to non-communicable diseases in Australia: evidence from a nationally representative cross-sectional study

Supplementary Materials

Appendix 1. Manual of the application of NOVA system to the 2011-13 AUSNUT database

A novel processed food classification system applied to disaggregated food codes in the Australian Food Nutrient Database 2011-13

-- Manual --

Presentation

This project is part of the thematic project "Consumption of ultra-processed foods, dietary nutrient profile and obesity in seven countries". The data source is the National Nutrition and Physical Activity Survey (NNPAS), conducted in 2011-12. This survey studied a random sample of the Australian population aged 2+ years (n=12,153).

Food consumption data were collected through two 24-h recalls. All foods and beverages purchased by households (after the exclusion of non-edible parts) were converted into energy and nutrients using data from the Australian Food Nutrient Database (AUSNUT) 2011-13 database.

Food items and/or the underlying ingredients were classified according to NOVA food classification system into the following four groups (and subgroups within these groups): Group 1 - Unprocessed or minimally processed foods (e.g. rice and other cereals, meat, fish, milk, eggs, fruit, roots and tubers, vegetables, nuts and seeds); Group 2 - Processed culinary ingredients (e.g. sugar, plant oils and butter); Group 3 - Processed foods (e.g. processed breads and cheese, canned fruit and fish, and salted and smoked meats); Group 4 - Ultra-processed foods (e.g. confectionaries, savoury snacks, fast food dishes, mass-produced packaged breads, frozen and ready meals and soft drinks). (Monteiro et al., 2018). The rationale underlying the classification is described elsewhere (Monteiro et al., 2016, 2018¹).

1 About AUSNUT 2011-13

AUSNUT 2011–13² is a set of files that enables food, dietary supplement and nutrient intake estimates to be made from the 2011–13 Australian Health Survey (AHS). It includes foods and dietary supplements consumed as part of the 2011–12 National Nutrition and Physical Activity Survey (NNPAS) and the 2012–13 National Aboriginal and Torres Strait Islander Nutrition and Physical Activity Survey (NATSINPAS) components of the AHS.

The complete AUSNUT 2011–13 contains the following 11 files:

Food details file – descriptive information on 5,740 foods and beverages to help users to identify where the nutrient data come from

Food composition database – 53 nutrient values for each of the 5,740 foods and beverages

Food recipe file – ingredient information on the 3,650 food and beverage recipes

Food retention factor file – information on the recipe factors

Food measures database – 16,152 measures for the 5,740 foods and beverages

Dietary supplement details file – descriptive information on 2,163 dietary supplements

Dietary supplement nutrient database – 35 nutrient values for each of the 2,163 dietary supplements

Dietary supplement recipe file – ingredient information on 18 dietary supplement recipes

Food and dietary supplement classification system

1995 NNS and 2011–13 AHS food classification concordance file

AUSNUT 2011–13 – AUSNUT 1999 Matching File

To apply NOVA system into the 2011-13 AUSNUT dataset, we used the following files: a) Food details file, b) Food composition database, c) Food recipe file.

²FSANZ. Food Standards Australia New Zealand, 2014. AUSNUT 2011-2013 - Food Composition Database. Available at: <<http://www.foodstandards.gov.au/science/monitoringnutrients/ausnut/pages/default.aspx>>.

2 Applying the NOVA system to the 2011-13 AUSNUT database

1st step: Identifying handmade recipes

We first combined the 'Food recipe file' with the 'Food composition database'. We also used the food name to identify handmade recipes. We identified 10 different sources of foods, which are presented below, including the decision about the disaggregation.

Food source		Examples	Decision
1	Homemade	13404004 Quiche, Lorraine, homemade	Apply recipe - disaggregate
2	Commercial	13101004 Biscuit, sweet, chocolate flavoured, commercial	Packaged foods do not disaggregate
		24904030 Salad, tabouleh, commercial	Potentially made from a commercial kitchen/ restaurant, disaggregate
3	Fast food	13505004 Chicken burger, white roll, chicken breast, with bacon, cheese, egg & sauce, fast food chain-style	Do not disaggregate
4	Takeaway	13503048 Kebab wrap, falafel, with salad & sauce, takeaway	Apply recipe - disaggregate
5	Purchased frozen	13502003 Pizza, cheese & tomato, purchased frozen, baked	Do not disaggregate
6	Ready to eat	13405008 Pastry, filled with spinach, commercial, ready to eat	Do not disaggregate
7	Cafe or restaurant	21602001 Soup, lentil or other legumes, from cafe or restaurant	Apply recipe - disaggregate
8	Dry (powder):	21201008 Soup, pea & ham, cup of soup, instant dry mix	Apply recipe – disaggregate (considering reconstitution)
9	Canned/ Preserved	24501006 Pea, green, canned in brine, cooked	Do not disaggregate
0	Unspecified	19401017 Cheese, haloumi	Packaged products do not disaggregate
		11202003 Coffee, cappuccino, from ground coffee beans, with regular fat cows milk	Potentially handmade, disaggregate

A total of 2,585 (45%) food codes were subject to disaggregation and this process was continued until all ingredients were single food items. For food codes with no recipe in the AUSNUT Food recipe file, we applied recipes of similar foods. The cases and the recipes applied to these foods is presented below.

Food code	Food description	Recipe used to replace
31304004	Stock, liquid, fish, homemade from basic ingredients	<i>Food code:</i> 31304003 Stock, liquid, fish, commercial <i>Ingredients:</i> 11701005 Water, tap 15101118 Fish, white flesh, raw, not further defined 31301007 Salt, table, non-iodised 11301015 Juice, lemon, commercial 27101006 Sugar, white, granulated or lump 24802009 Onion, mature, brown skinned, peeled, raw 31302017 Pepper, ground, black or white 29202005 Wine, white, cooked
31304002	Stock, liquid, all flavours (except fish), homemade from basic ingredients	There is no similar recipe (only with fish as mentioned before. We applied the previous recipe: <i>Food code:</i> 31304003 Stock, liquid, fish, commercial.
21102004	Soup, minestrone, prepared, from cafe or restaurant	<i>Food code:</i> 21102008 Soup, mixed vegetable & legume, with pasta or grains, prepared with stock or water, homemade from basic ingredients <i>Ingredients:</i> 24802013 Onion, mature, peeled, fresh or frozen, baked, roasted, 24802002 Garlic, peeled or unpeeled, fresh or frozen, baked, roast 24101049 Potato, peeled, raw, not further defined 24701013 Pumpkin, peeled, fresh or frozen, raw 24301005 Carrot, mature, peeled or unpeeled, fresh or frozen, raw 24702007 Zucchini, green skin, fresh or frozen, peeled or unpeel 24502005 Bean, green, fresh or frozen, raw 24602006 Tomato, whole, canned in tomato juice, undrained 31304001 Stock, liquid, all flavours (except fish), prepared from c 24401013 Spinach, fresh, raw 24403006 Herbs, mixed, raw 14602003 Fat or oil, not further defined, for use in home cooked r 31302017 Pepper, ground, black or white 12101013 Grains & pasta, for homemade soup recipes 25101020 Legumes, mixed, for use in homemade soup recipes
18701014	Curry, commercial, beef, vindaloo sauce	<i>Food code:</i> 18701013 Curry, commercial, beef, tomato based sauce <i>Ingredients:</i> 18101025 Beef, casserole cuts, fully-trimmed, boiled, casseroled, 24802019 Onion, mature, peeled, fresh or frozen, boiled, microwa 24802003 Garlic, peeled or unpeeled, fresh or frozen, boiled, micr 24302021 Ginger, peeled, fresh or frozen, boiled, microwaved or 14403001 Oil, not further defined 24602008 Tomato, whole, canned in tomato juice, boiled or micro 23109002 Paste, curry, Indian style, commercial 31301007 Salt, table, non-iodised 14102001 Ghee, clarified butter 24803021 Mixed vegetables, cooked, for use in all other curry rec

Food code	Food description	Recipe used to replace
18705007	Curry, commercial, lamb, dairy based sauce	<p><i>Food code:</i> 18705009 Curry, commercial, lamb & vegetable, dairy based sauce</p> <p><i>Ingredients:</i></p> <p>24802019 Onion, mature, peeled, fresh or frozen, boiled, microwaved</p> <p>24802003 Garlic, peeled or unpeeled, fresh or frozen, boiled, microwaved</p> <p>24302021 Ginger, peeled, fresh or frozen, boiled, microwaved or microwaved</p> <p>14403001 Oil, not further defined</p> <p>24602008 Tomato, whole, canned in tomato juice, boiled or microwaved</p> <p>19201004 Yoghurt, natural, regular fat (~4%)</p> <p>22204006 Nut, almond, without skin, blanched, unsalted</p> <p>23109002 Paste, curry, Indian style, commercial</p> <p>14102001 Ghee, clarified butter</p> <p>18102013 Lamb, casserole cuts, semi-trimmed, boiled, casseroled</p> <p>31301007 Salt, table, non-iodised</p> <p>24803021 Mixed vegetables, cooked, for use in all other curry recipes</p>
18705020	Tandoori lamb, commercial	<p><i>Food code:</i> 18901031 Tandoori chicken, homemade, with commercial paste & yoghurt</p> <p><i>Ingredients:</i></p> <p>18301030 Chicken, fillet or kebab, flesh, raw</p> <p>23109002 Paste, curry, Indian style, commercial</p> <p>19201002 Yoghurt, Greek style (~8%), natural</p> <p>24802002 Garlic, peeled or unpeeled, fresh or frozen, baked, roasted</p> <p>11302004 Juice, lemon, home squeezed</p> <p>14403001 Oil, not further defined</p> <p>24802012 Onion, mature, peeled, fresh or frozen, raw, not further processed</p>

2st step: Applying NOVA system into food codes or underlying ingredients after full disaggregation

Two experts with Australian food and dietary intake knowledge applied the NOVA system to the AUSNUT 2011-13. All classifications were checked by another two independent food assessment experts and where classification discrepancies arose, these were discussed until consensus was reached amongst all researchers. We applied NOVA system in the ingredient fully disaggregated level, considering:

- a) The AUSNUT classification system that considers a major (two-digit), sub-major (three-digit), minor (five-digit) food group or the survey ID (eight-digit). For instance, the sub-major (three-digit) was used to classify all soft drinks (e.g. 115 - Soft drinks, and flavoured mineral waters) in the ultra-processed food group. The minor (five-digit) was used to classify preserved fruits (e.g. 16104 –Pears, commercially sterile) in the processed food group, while the survey ID (eight-digit) was used to identify exceptions (e.g. 16104011 Pear, canned in intense sweetened liquid, drained – classified as ultra-processed food)

- b) The source of food, for non-disaggregated food codes. All fast foods and meals purchased frozen were classified in the ultra-processed food groups, and most of the canned/preserved foods were classified in the processed food group
- c) Information present in the list of ingredients of food items sold in the Australian supermarkets websites (Coles and Woolworths). These supermarket chains hold a 70% of market share in Australia (Roy Morgan Research, 2017³)
- d) Previous publication applying the NOVA system into non-disaggregated AUSNUT 2011-13 (O'Halloran et al., 2017⁴)

When the classification of a food item was not clear (e.g. cake or cupcake, honey, commercial or homemade), the conservative alternative was chosen (homemade in this case, and thus disaggregated).

Breads, frequently consumed by the Australian population, may be either processed or ultra-processed foods. We first identified the processed breads, and these included: focaccia, ciabatta, baguette, pane di casa, sour dough, flats (naan, paratha, chapatti, roti, injera, and pita), pumpkin bread, corn bread and tortillas. The ultra-processed breads identified were: bagel, breadcrumbs, hot dog breads, fast food breads, pizza bases, all light breads and with addition of fibre, vitamins and minerals.

Of the 62 generic bread codes where the NOVA classification was not easily apparent, there were two generic bread codes that contributed the most to total bread energy intake (25% combined): i) Bread, from white flour, commercial, ii) Bread roll, from white flour, commercial. According to the AUSNUT 'Food details file', for the first bread code (i), proximates, vitamins, minerals, and fatty acids were derived from of *8 samples of Bakers Delight white bread purchased nationally in 2008 (2008 KFP) and a composite or individual analysis of 10 purchases of 6 brands (4x Mighty Soft, 2x Helgas, 1x Sunblest, 1x Foodland, 1x Super Soft, 1x Master White) of white bread purchased nationally in each state and territory capital city and two regional centres in NSW and QLD (2006 - KFP)*. As the samples were mostly of mass-produced branded breads, based on observation of bread types across a range of supermarkets websites and other retailers in Melbourne, this bread code was classified as ultra-processed. For the second bread code (ii), *the majority of nutrient data including minerals, moisture, fibre, protein, starch, B1, B3 and pantothenate were derived from individual analysis of 10 purchases of 5 brands of bread rolls (4x Coles, 2x Woolworths, 2x TipTop, 1x IGA, 1x local bakery) purchased nationally in each state and territory capital city and 2 regional centres in NSW and QLD (2006 - KFP). Fat, ash, sugars, tryptophan and vitamins were determined in a*

³Roy Morgan Research, 2017. Aldi hits new high in supermarket wars. Available at: <http://www.roymorgan.com/findings/7234-woolworths-coles-aldi-iga-supermarket-market-shares-australia-march-2017-201705171406>

⁴O'Halloran, S.A.; Lacy, K.E.; Grimes, C.A.; Woods, J.; Campbell, K.J.; Nowson, C.A. A novel processed food classification system applied to Australian food composition databases. *Journal of Human Nutrition and Dietetics*, 2017.

composite of the 10 purchases in the same program. As the samples were mostly of simple unpackaged breads, based on observation of bread types across Coles and Woolworths supermarkets in Melbourne, this bread code was classified as processed bread.

All the remaining breads were classified as processed breads as the conservative approach. Sensitivity analyses were carried out to account for exposure misclassification of breads and are presented in the previous section (Appendix 1).

The final application of NOVA system to the groups and subgroups of the 2011-13 AUSNUT dataset is presented further in the document *Food Group Code Classified* (Appendix 3).

The groups and subgroups of NOVA food classification system applied to the AUSNUT 2011-13 is presented below. For the analyses, we aggregated the following subgroups:

Red meat and poultry: Red meat (subgroup 4) + Poultry (5)

Fruits: Fruits (2) + Freshly squeezed juices (47)

Frozen and shelf stable ready meals: Packaged ready meals (26) + Industrial French fries (33) + Frozen pizza (38) + Instant and canned soups (40)

Pastries, buns, and cakes: Pastries, buns, and cakes (32) + Industrial desserts (39)

Other ultra-processed foods: Other ultra-processed foods (45) + Ultra-processed cheese (44)

Groups and subgroups of NOVA food classification system applied to the AUSNUT 2011-13/ NNPAS 2011-12

Group	Subgroup	
1		Unprocessed or minimally processed foods
	1	Milk and plain yoghurt
	2	Fruits
	3	Potatoes and other tubers and roots
	4	Red meat
	5	Poultry
	6	Cereals
	7	Pasta
	8	Vegetables
	9	Eggs
	10	Nuts and seeds
	11	Fish
	12	Legumes
	13	Other unprocessed or minimally processed foods ^a
47	Freshly squeezed juices	
2		Processed culinary ingredients
	14	Salt
	15	Table sugar
	16	Animal fats
	17	Plant oil
18	Other processed culinary ingredients ^b	
3		Processed foods
	19	Beer and wine
	20	Cheese
	21	Vegetables and other plant foods preserved in brine
	22	Processed breads
	23	Bacon and other salted, smoked or canned meat or fish
	24	Other processed foods ^c
4		Ultra-processed foods
	25	Mass-produced packaged breads
	26	Packaged ready meals
	27	Breakfast cereals
	28	Sausage and other reconstituted meat products
	29	Confectionary
	30	Ice cream, ice pops and frozen yogurts
	31	Biscuits
	32	Pastries, buns, and cakes
	33	Industrial French fries
	34	Margarine and other spreads
	35	Milk-based drinks
36	Sauces, dressing and gravies	
37	Packaged salty snacks	
38	Frozen pizza	
39	Industrial desserts	
40	Instant and canned soups	
41	Soft drinks, carbonated	
42	Fruit drinks and iced teas	
43	Alcoholic distilled drinks	
44	Ultra-processed cheese	
45	Other ultra-processed foods ^d	
46	Fast food dishes	

a Including non presweetened, non-flavored coffee and tea; coconut water; b Including vinegar; baking powder and baking soda; c Including salted or sugared nuts and seeds; peanut, sesame, cashew; d Including soya products such as meatless patties and fish sticks; baby food and baby formula.

Appendix 3. Sensitivity analyses to account for exposure misclassification of breads**Table S1.** Average nutrient content of the overall diet and of two diet fractions. Australian population aged 2+ years (NNPAS 2011–2012) (n = 12,153)[‡].

Nutrients	Overall diet		Ultra-processed food diet fraction		Non-ultra-processed food diet fraction ^a	
	Mean	(SE)	Mean	(SE)	Mean	(SE)
Free sugars (% of total energy)	11.7	(0.1)	24.3	(0.2)	4.2*	(0.1)
Total fats (% of total energy)	31.1	(0.1)	35.3	(0.2)	28.7*	(0.1)
Saturated fat (% of total energy)	12.0	(0.1)	14.1	(0.1)	10.6*	(0.1)
Trans fat (% of total energy)	0.6	(0.0)	0.6	(0.0)	0.6	(0.0)
Dietary fibre (g/1,000 kcal)	11.5	(0.1)	8.9	(0.1)	13.3*	(0.1)
Sodium (mg/1,000 kcal)	1213	(6.4)	2414	(96.5)	986*	(6.7)
Potassium (mg/1,000 kcal)	1444	(6.6)	1125	(10.9)	1695*	(8.8)
Energy density (kcal/g) ^b	1.7	(0.0)	2.7	(0.0)	1.5*	(0.0)

SE: Standard Error

[‡]Analyses considering 11.6% of total energy intake from processed breads (20.6% of total energy intake from processed foods, 37.2% of total energy intake from ultra-processed foods).^aIt includes NOVA unprocessed or minimally processed foods, processed culinary ingredients and processed foods.^bBeverages excluded.

*p<0.001 for significant mean differences between the two fractions of the diet.

Table S2. Average nutrient content of the overall diet according to quintiles of the dietary share of ultra-processed foods. Australian population aged 2+ years (NNPAS 2011–2012) (n = 12,153)[‡].

Nutrients	Quintiles of the dietary contribution of ultra-processed foods (% of total dietary energy) [‡]					Standardized regression coefficients ^b	
	Q1	Q2	Q3	Q4	Q5	Crude	Adjusted [†]
Free sugars (% of total energy)	5.5	8.9	11.5	14.5	17.9	0.48*	0.46*
Total fats (% of total energy)	29.9	30.4	30.8	31.4	32.7	0.10*	0.10*
Saturated fat (% of total energy)	10.3	11.2	12.1	12.7	13.5	0.24*	0.21*
Trans fat (% of total energy)	0.52	0.56	0.59	0.63	0.65	0.12*	0.11*
Dietary fibre (g/1,000 kcal)	13.4	12.3	11.5	11.0	9.3	-0.25*	-0.22*
Sodium (mg/1,000 kcal)	1080	1160	1212	1280	1338	0.17*	0.17*
Potassium (mg/1,000 kcal)	1654	1534	1463	1388	1181	-0.28*	-0.24*
Energy density (kcal/g) ^c	1.5	1.6	1.7	1.8	2.1	0.40*	0.38*

[‡]Analyses considering 11.6% of total energy intake from processed breads (20.6% of total energy intake from processed foods, 37.2% of total energy intake from ultra-processed foods).

^aPercentage of total energy intake from ultra-processed foods. Mean (range): Q1= 9.6 (0 to 17.6); Q2= 23.6 (17.6 to 29.3); Q3= 35.2 (29.3 to 41.4); Q4= 48.2 (41.4 to 56.3); Q5= 69.5 (56.3 to 100).

^bObtained with linear regression of the dietary nutrient content on the quintiles of the dietary share of ultra-processed foods, and expressed in standard deviation units.

^cBeverages excluded.

[†]Adjusted for age, sex, educational attainment, socio-economic status and geographical location.

*Statistically significant p<0.001

Table S3. Prevalence (%) of non-recommended nutrient intake levels according to quintiles of the dietary share of ultra-processed foods Australian population aged 2+ years (NNPAS 2011–2012) (n = 12,153)[¥].

Quintiles of the dietary contribution of ultra-processed foods (% of total dietary energy) [¥]	Non-recommended nutrient intake levels of:															
	Free sugars		Total fat		Saturated fat		Trans fat		Dietary fibre		Sodium		Potassium		Energy density	
	≥10% of energy		≥30% of energy		≥10% of energy		≥1% of energy		≤12.5g/ 1,000 kcal		≥1,000 mg/ 1,000 kcal		≤1,755mg/ 1,000 kcal		≥2.25kcal/g
